src/test/resources/features/crossendpoint.feature:3

Passed Validate pet exists in sold list

Overview | History | Retries

Severity: normal

Duration: 8s 797ms

Execution

Test body

- Given I create a pet with name "pet_<timestamp>" and status "available" 4s 535ms
- Then API response should be successful 7ms
- And I store pet id from response 980ms
- When I update pet status to "sold" 1s 338ms
- Then API response should be successful 0s
- When I fetch pets with status "sold" 1s 567ms
- Then pet list response should be successful 0s
- When I search for stored pet id in list 347ms
- Then pet should exist in the list 1ms

src/test/resources/features/inventory.feature:3

Passed Compare inventory and API list

Overview | History | Retries

Severity: normal

Duration: 3s 692ms

Execution

Test body

- Given I fetch inventory 1s 599ms
- Then inventory response should be successful 1ms
- And I extract available count 2ms
- When I fetch pets with status "available" 1s 516ms
- Then pet list response should be successful 0s
- And I count pets in list 567ms
- Then both counts should match 4ms
